Data visualization for GPUs since 2009

Christopher Espina, Hudson Wood, David Williams, Israel Klebanoff

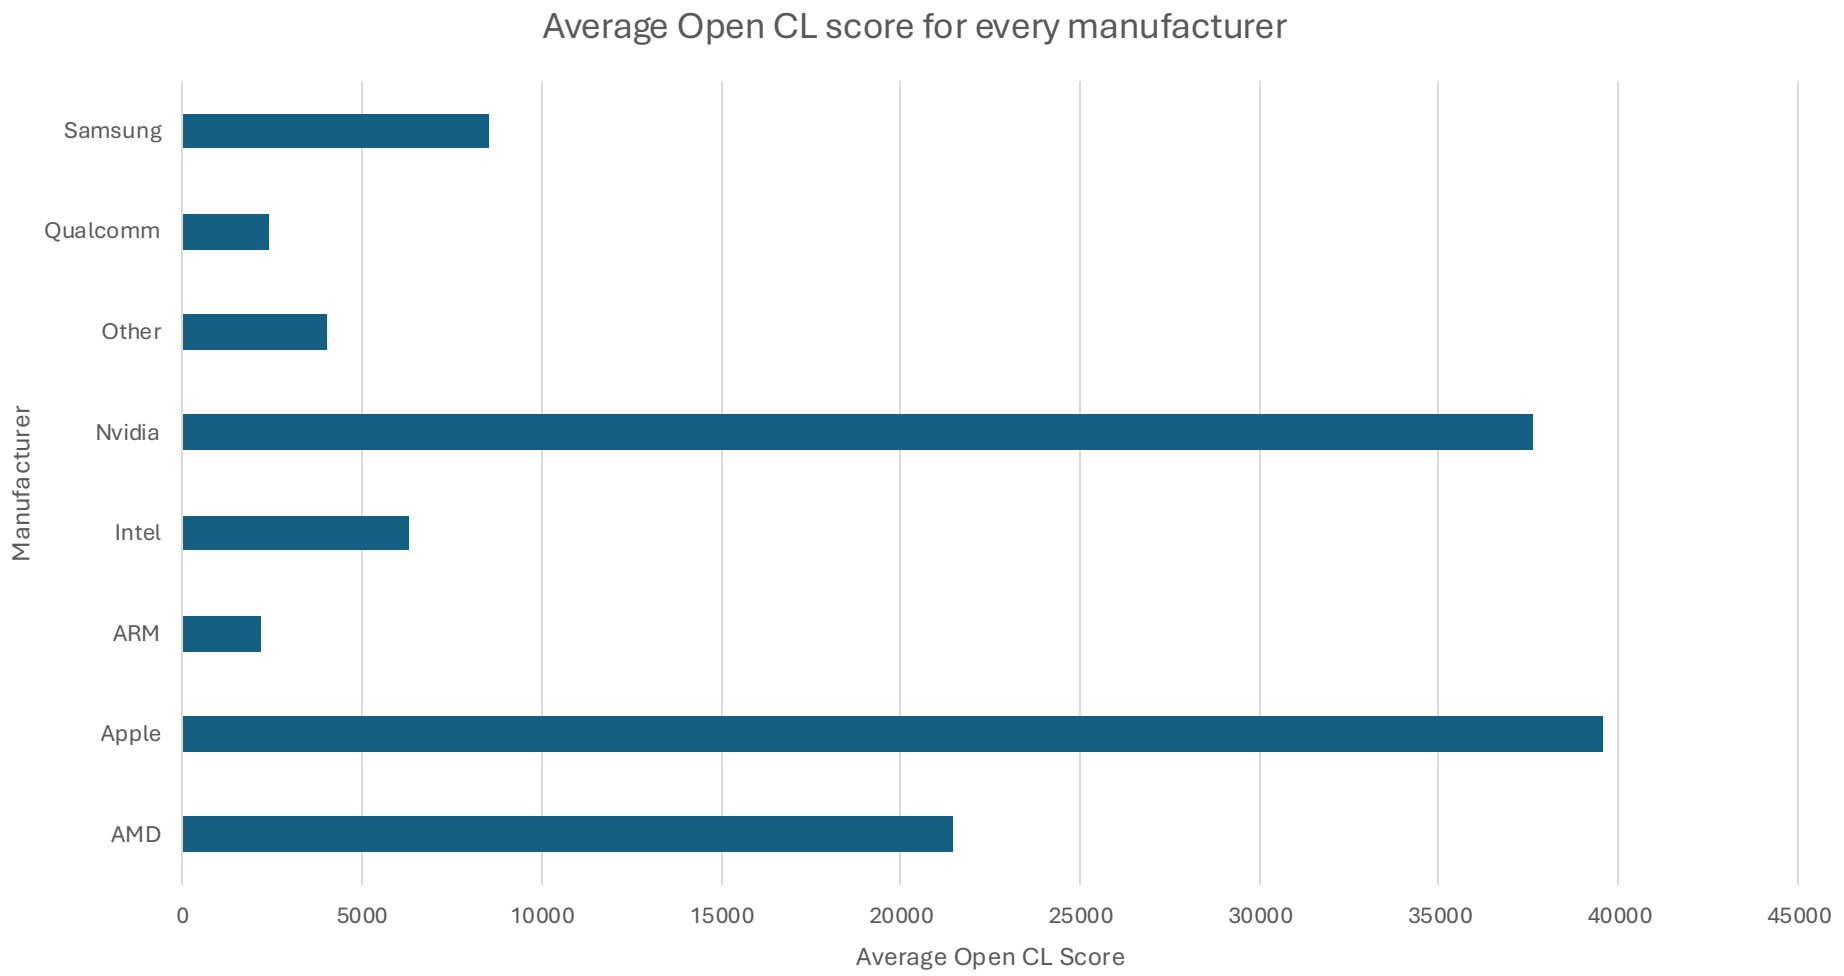

The distribution of G2D (2D graphics quality) mark scores for GPUs appears to be Right skewed.

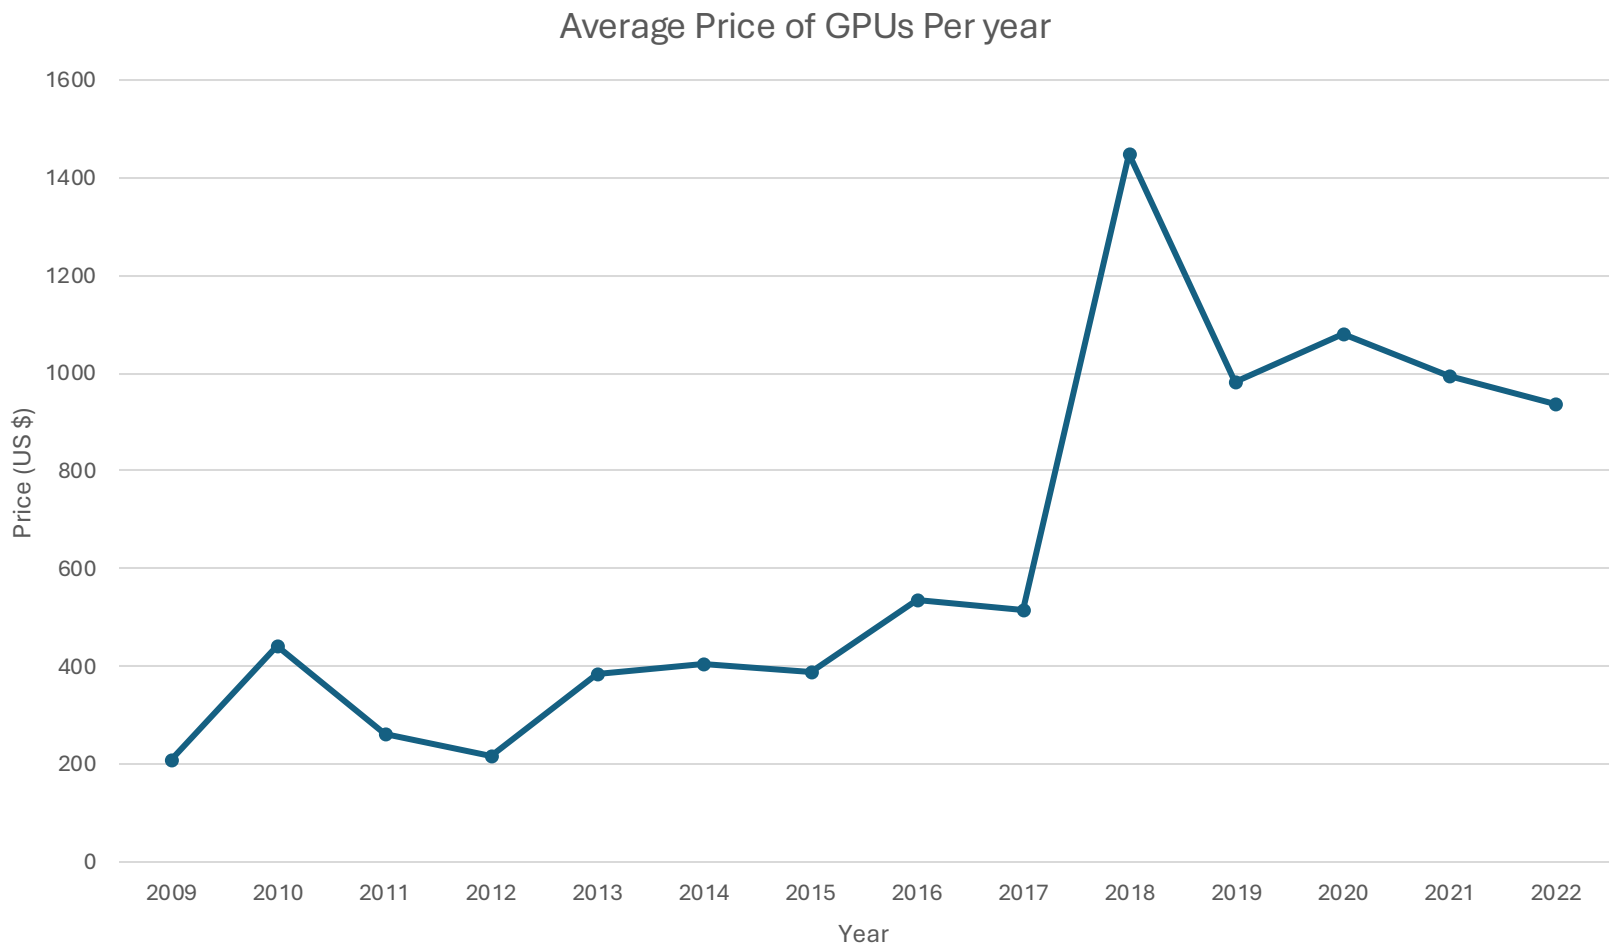

There is a weak relationship between Thermal Design Power and Power Performance

For Manufactures Nvidia and Apple dominate with much higher Open CL scores then everyone else

Yearly Data reveals that the average price of GPUs have increased over time, indicating a higher level of demand.

How has the average launch price of consumer GPU's changed overtime? In order to create this time-series graph, we used the
